DRAINAGE SYSTEMS FOR YACHTS

STAINLESS STEEL DRAINAGE SYSTEMS

# Drainage systems for marine applications all over the world

Founded in 1965 by plumber Mr. Johannes Blücher Skibild, BLÜCHER has over the years developed into a leading European stainless steel drainage specialist, providing high-quality drainage solutions for customers within the marine, housing, commercial and industrial segments.

BLÜCHER® drainage systems have proven their functionality and reliability in maritime applications all over the world. Luxury yachts, cruise liners, ferries, commercial vessels, naval vessels and off-shore installations are among the typical users of BLÜCHER® drainage solutions.

BLÜCHER is committed to the promise of **Keeping up the flow**. Ship owners and crew depend on the performance of our solutions every day where comfort, hygiene, light weight and durability are essential. We offer a comprehensive range of products to solve any drainage requirement.

At BLÜCHER, **Knowing how** means putting years of expertise in stainless steel into practical use, and it means knowing how to stay at the forefront through investments in the newest product design, testing and production facilities. BLÜCHER is considered one of the most innovative companies within marine drainage. Continuing to develop inventive products and solutions, staying ahead through knowing how is still our ambition.

BLÜCHER is **Dedicated to service** and meeting the demands of our customers is part of our company culture. Therefore, our employees is our most valuable asset, offering our customers a flexible and efficient service. Local stocks of standard components ensure fast delivery all over the world.

**Common sense** and close attention to our markets enable us to utilize our know-how and adapt our products and solutions to customer requirements everywhere.

## Segments

### Housing

Drainage solutions for bathrooms, utility rooms and basements in single- and multi-storey housing, preventing bad smell and standing water from becoming a concern.

### Commercial

Hospitals, schools, restaurants and fitness centres benefit from the wide range of BLÜCHER® drainage solutions. The smooth stainless steel surface and high flow capacity prevent settlements and standing water in public areas, and the modular systems provide numerous possible combinations.

### Industrial

BLÜCHER specializes in drainage solutions for large industrial facilities. Among the industries in which we play a major part are the food industry and the pharmaceutical industry, relying on our hygienic and durable solutions.

### Marine

Cruise liners, ferries, yachts, commercial and navy vessels, off-shore installations all depend on the performance of our solutions at sea where safety, good hygiene, prevention of bad odours and light-weight systems are essential.

## Product groups

### BLÜCHER® EuroPipe

Complete range of push-fit pipes and fittings in stainless steel from OD40 to OD200 mm.

### BLÜCHER® Channel

Standard, modular and custom-made channels and kitchen channels all in stainless steel.

### BLÜCHER® Drain

Stainless steel point drains for all types of deck floors. Height adjustment, rotation, tilt and removable water trap.

## Why choose a BLÜCHER® stainless steel drainage system

Hygiene, fire protection and operational reliability are essential for safety and wellbeing onboard. BLÜCHER® drainage products have smooth, easy-to-clean surfaces and tight joints preventing bad odours. From toilets to sewage tank, BLÜCHER offers a complete system for black- and grey water discharge, including also drains and pipe penetrations for welding directly into aluminium decks. All in stainless steel, the BLÜCHER® drainage system is non-combustible and lightweight, and thanks to careful product design the BLÜCHER® drainage system offers aesthetic and space-saving solutions. The extensive standard product range complemented by customized components made exactly to your specifications ensure that any drainage requirement can be met.

- > Complete and approved system
- > For vacuum and gravity drainage
- > Dedicated service
- > Worldwide delivery certainty
- > Customized solutions
- > Light-weight and space-saving
- > Tight joints preventing odours
- > Excellent hygiene
- > Non-combustible
- > Long product life expectancy

ECLIPSE - Carl Groll / SuperYachtPhoto.com

# BLÜCHER World class: Eclipse

With a length of 163 metres and a gross tonnage of 13000 tonnes, Eclipse is the world's largest superyacht, owned by the Russian/UK billionaire Roman Abramovich. The BLÜCHER® design solutions and the high-quality drainage products selected and provided in close cooperation with Blohm + Voss shipyard contribute to the comfort and wellbeing onboard.

Delivery of Eclipse took place in December 2010.
